👤 Profile

I see software development as a hobby rather than a job.

I have had the opportunity to use many technologies by developing desktop and web applications for 5 years. I continue to learn and grow in life using research skills and accumulated experience, following a "be your own teacher" philosophy.

Javascript is my main programming language. I share the projects I have developed to learn and improve myself on Github as open source. I am working as a Front-end developer at Heybooster.

My vision is to develop myself as a high quality software developer/engineer following the ethical code of hackers.

🧰 Professional Experience

Heybooster, Front End Developer 

09/2020 – present

Technologies: Pure Javascript, Vue JS, Vuex, Webpack, HTML5, SCSS(CSS3), Vite.js, Typescript, Tailwind CSS

I had the following tasks in the app.heybooster.ai .

Responsibilities

✓ Maintainable and sustainability of front end projects

✓ Responsive Design

Responsive development of non-Responsive designs by rearranging or rewriting them

✓ Improving Web performance

- Improvements to improve site transitions and user experience in addition to increasing site speed

- Detecting and resolving bugs for front-end development

✓ Productivity Improvement

✓ Improving legacy code

✓ Correcting or rewriting codes according to clean code principles.

✓ Defining code writing principles to be used within the team to write code better and improve code readability and sharing them with the team

✓ Creating and using Vuex modules by actively using Vuex to keep data more organized and easier to manage

✓ Testing all improvements/fixed bugs

✓ Upgrade Vue v2 to Vue v3: <https://medium.com/heybooster/adventures-of-a-front-end-developer-migration-of-front-end-project-e3b949bdde90>

Free Software and Open Source Developer, Software Developer [↗](#)

02/2019 – 10/2020

Technologies: Javascript, Vue.js, JQuery, Python , PHP , HTML5 , CSS3 ,Bootstrap

Development of projects using various technologies

- Real Time Two Player Intelligence Game Tactix | React.js [↗](#)
